

Job Title: Farm Supervisor - Newton Poultry Farm

Location: Freetown, Sierra Leone

Newton Poultry: A newly setup layer poultry farm, with a flock in excess of 20,000 birds and modern European standard equipment.

Job Type: Full-Time

Job Summary: We are seeking an experienced and dedicated Farm Supervisor for our layer poultry farm. The ideal candidate will oversee daily farm operations, manage staff, and ensure the welfare of our poultry flock while maintaining high production standards. Experienced candidates with at least 1 year experience is preferred.

Key Responsibilities:

1. Operational Management:

- Oversee the daily operations of the layer poultry farm.
- o Ensure the implementation of biosecurity and animal welfare protocols.
- Monitor and manage egg production and quality.

2. Team Leadership:

- Supervise farm staff, including training, scheduling, and performance reviews.
- o Foster a positive and efficient work environment.

3. Health and Safety:

- o Implement and enforce health and safety regulations.
- Conduct regular health checks on the poultry and report any issues.

4. Feeding and Nutrition:

- o Manage feeding schedule to ensure optimal growth and production.
- Collaborate with nutritionists to develop balanced diets for the layers.

5. Record Keeping:

- Maintain accurate records of production, feed consumption, and health parameters.
- o Prepare reports for management on farm performance.

6. Equipment Maintenance:

- Oversee the maintenance and operation of farm equipment and facilities.
- Coordinate repairs and ensure proper functionality of the farm's systems.

Qualifications:

- Proven experience in poultry management or farm supervision.
- Familiarity with layer poultry production and biosecurity practices.
- Strong leadership and communication skills.
- Ability to work in a physically demanding environment.
- Proficiency in record-keeping and farm management (preferred).
- Any certifications from recognised bodies in poultry farming, vaccinations agriculture management
